

Dear parents,

beyond the original schedule for the release of measures in schools, the Government of the Czech Republic approved a **possibility of** implementation of occasional educational and socialisation activities for pupils of upper primary schools and students of secondary schools, except for the final years, in the period from 8 to 30 June 2020. It is an option (offer) for schools, and it is up to the specific personnel, material and spatial conditions of each school whether it will use this option, to what extent and in what way. It is therefore not a matter of operating in a similar regime as in the case of lower primary schools, but rather the possibility of holding consultations or form teacher's classes. If the school cannot ensure this in terms of personnel and spatial conditions, it is not the duty of the school to implement these activities. Participation in activities is voluntary.

Primary school (name of the school) will carry out occasional educational and socialisation activities on the basis of a permit from the Government of the Czech Republic dated 26 May 2020.

Primary school (name of the school) will not carry out occasional educational and socialisation activities for operational reasons.
